

Animal Imaging Workshop

Date: 12 and 13 September 2019
10am to 4pm
Node: UQ
Venue: Level 2 Seminar Room
Building 57
The University of Queensland, St Lucia

Centre for
Advanced Imaging

Centre for Innovation in
Biomedical Imaging Technology
An ARC Industrial Transformation Training Centre

About the Workshop:

Proudly supported by the University of Queensland, Centre for Advanced Imaging (CAI), The Centre for Innovation in Biomedical Imaging Technology (CIBIT) and PerkinElmer, the 3rd Animal Imaging Workshop is organised by the CBNS Education and Training Committee. This workshop covers a range of important aspects of animal imaging, through a theoretical component and hands-on session.

Over 2 days, participants will get the opportunity to focus their time on imaging that will help them with their research projects. The workshop will cover the theory, practical, and analytical information and hands-on practice needed for doing the imaging experiments with the aim of preparing the participant for future imaging studies.

Morning tea, lunch and afternoon tea will be provided.
